

Improve Your Lobby Lighting While Slashing Energy Costs

with LED Saving Solutions LED Lobby Retrofit Program. Lobbies simply use more lighting power per square foot than other areas of the building, making them prime candidates for an LED lighting retrofit. The most common retrofit is a simple bulb replacement that results in a 90% energy savings.

Since your lobby is one of the most 'high profile' areas, it is imperative that the lighting is top-of-the-line and makes a great impression on your guests. Our team of lighting designers, architects, and engineers, will make sure that your lobby has the right amount of light, the right color of light, and is overall aesthetically pleasing.

Sample LED Lobby Retrofit Economics

Current Annual Lighting Operating Cost: \$3,285

Annual Operating Costs with LEDs: \$394

Annual Energy Savings: \$2,891

Cost of Retrofit: \$2,297
